

## **ControlByNet Partners with M3T to Offer Cloud Video**

*ControlByNet, a software development leader in cloud-based video surveillance solutions, announced today a partnership with M3T Corporation to offer Cloud, or hosted, video to its customers.*

Atlanta, GA ([PRWEB](#)) December 17, 2014 -- ControlByNet, a software development leader in cloud-based video surveillance solutions, announced today a partnership with M3T Corporation to offer Cloud, or hosted, video to its customers. M3T Corporation is a well-known security integrator that services Pennsylvania and surrounding states. [ControlByNet](#) provides software that allows integrators to instantly offer hosted video to customers, creating an additional option to increase monthly recurring revenue by providing a valuable solution to customers.

"We have tested the software for some time and have found it to be very reliable and a great addition to our VAHMS® (Video Access Hosted Managed Services) portfolio of cloud based security solutions," said John Maffey, President of M3T Corporation. "Our clients find the user interface uncluttered and easy to navigate."

[ControlByNet's i-flashback](#) software lets integrators take on hosting of cloud-video. The software provides a full management interface for total control allowing hundreds of cameras and customers across servers. For integrators wanting to stay out of the IT side of things ControlByNet can host the video for the integrator.

"M3T is the ideal candidate for this kind of solution. They have the knowledge and respect in their area to immediately offer Cloud video as an option to customers," said Ryan Strange, CEO of ControlByNet. "While seen as a hot topic in the press, cloud video is still new or undiscovered by most small businesses and presents a new direction for integrators."

About M3T ([www.M3Tcorporation.com](http://www.M3Tcorporation.com))

M3T Corporation, a veteran-owned small business, provides professional security consulting, solution design, and implementation both in the physical and cyber security realms. M3T delivers a variety of world-class integrated security and technology solutions that save businesses valuable time, resources and money. M3T provides solutions in five different channels: System Integration (Access Control, Badging, Intercoms, Intrusion, Video Surveillance and Wander Management), Hardware Integration (Door Hardware, Keying/Locksmith Services and Safes/Vaults/Fireproof File Cabinets), Automatic Access Integration (Powered Pedestrian Doors, Turnstiles and Vehicle Gates), Technical Services and Cyber Security (Cyber Security, Hosted Solutions – VAHMS Cloud-based Video and Access Control, Information Security, Network Services and Wireless Systems), and Service Integration (Maintaining Client Systems and AAADM Inspections). About ControlByNet ([www.ControlByNet.com](http://www.ControlByNet.com))

ControlByNet provides the most flexible Cloud and managed IP-based surveillance solution on the market. ControlByNet's innovative Cloud Plus™ software is the cornerstone for the new security surveillance business model. By leveraging Software as a Service (SaaS), CBN's solution integrates seamlessly across its products creating limitless installation scenarios. The hierarchal nature of the software allows a single log-in across multiple accounts hosted on multiple servers – anywhere on the Internet. While the i-flashback interface is as simple to use as a nanny cam, both versions of the software are sophisticated enough to manage thousands of remote cameras from a single browser interface. Cloud Plus™ is fully html 5.0 browser-compliant, meaning the

web interface operates on all current browsers including all mobile devices (Windows, iPhone, Android). For more information, visit [www.ControlByNet.com](http://www.ControlByNet.com).
